

ResultsOnDemand® is a Learning Management System (LMS) and content delivery solution hosted in a state-of-the-art data center. The ResultsOnDemand technology is based on the TotalLMS™, which has been implemented in the largest and most complex global enterprises. This ASP solution couples industry-leading technology and services to provide companies with a low cost, low risk and fast time to deployment learning solution.

Low Cost of Entry

Low initial setup and monthly subscription fees allow you to introduce a full-featured LMS to your organization without significant initial investment. With ResultsOnDemand, there is no need for hardware procurement or enterprise licensing.

Fast Implementation Time

Implementing ResultsOnDemand is streamlined and efficient. The ASP environment allows you to be up and running with a branded environment in just a few weeks.

Low Risk

With a fast implementation timeline and a low cost of entry, you can use ResultsOnDemand to effectively implement a top-of-the-line Learning Management System with little risk of budget or delays. If you decide to make the move to either a hosted or behind-the-firewall enterprise implementation, your experience in ResultsOnDemand will significantly shorten the time required to get you up and running as you will be familiar with the interface.

Hosted Dependability

With ResultsOnDemand, you leave the hardware maintenance and monitoring in the

capable hands of our data center team. We take care of all your concerns including guaranteed up time, security, bandwidth availability and global accessibility.

Training

To get you up and running quickly, ResultsOnDemand includes easily accessible online training for all major roles in your team. The Student and Manager courses are available in your ASP environment for no

additional cost. This provides you the valuable assets you need to support your user population to quickly and effectively adopt a new system.

Content Integration

ResultsOnDemand includes content integrations with industry standards such as AICC and SCORM, as well as specific custom integrations with many of the larger content providers. SumTotal also maintains a library of content fully tested and confirmed to work with ResultsOnDemand. If you are in the market for off-the-shelf content, be sure to let us know so we can help guide you through the selection process. If you already have content but are unsure whether it adheres to standards, let our technology partners help with identification, modification or even ground-up creation of the content.

Reporting

ResultsOnDemand is a full featured Learning Management System that includes a host of reports to help you get the information back out of system for review or analysis. Reports are easy to access and run, and can be administered securely to the target members of your team.

Support

The ResultsOnDemand ASP subscription includes support provided by the same support team servicing all of our TotalLMS customers. They have the same high level of expertise, dedication, and drive to resolution to help you succeed. Extended support is also available for the global customer using ResultsOnDemand requiring 24x7 service.
